INTRODUCTION

This document is created to bring the UNS Token into the world and it acts as the basic fundamental document produced by the UNS Project Team to inform Investors, Crypto enthusiasts, Traders, and Crypto utility supporters about the birth of the UNS token which is a Multi-Sector Utility Token.

UNS token is created on the **Binance Smart Chain** and will be the Backbone of the growing Economy. This white paper is the only official document produced by the project owners and the information provided here is as per the best of the knowledge, awareness, and experience of the project team and is being produced with the intention of explaining the technology, utility, and incentives associated with the UNS ecosystem.

This document will be updated regularly as the ecosystem expands and the token utility increases with future integrations and partnerships that will be plugged into the UNS ecosystem and this will be the only official document to be referred for UNS token project details, along with project website <https://uns.technology>

UNS operates from Singapore, Dubai, and Thailand.

UNS Token, a Multi-Sector Utility **BEP20 Token** connects real-life utilities to the digital world, and is focused on building partnerships with various organizations specifically in essential sectors, to build a better economy. This whitepaper will discuss these sectors in more detail individually along with how UNS wishes to impact these sectors and in turn create a sustainable ecosystem of development and growth.

UNS ~ REDEFINING UTILITY

AGRICULTURE

New technologies are coming up every day in the world. As the world population is growing, the agriculture industry is also developing new techniques to grow food in less space and by saving water. The hydroponic growing system is a step towards this.

The Hydroponic System is a system of growing crops without soil, often called soil-less farming. In the hydroponic system, the plant roots grow in a liquid nutrient solution or inside the moist inert materials like Rockwool and Vermiculite. The liquid nutrient solution is a mixture of essential plant nutrients in the water.

The plant roots are suspended either in the static liquid solution or in a continuously flowing nutrient mixture. The hydroponic growing system requires continuous attention to the crops, unlike the traditional farming system.

Advantages of Hydroponic System

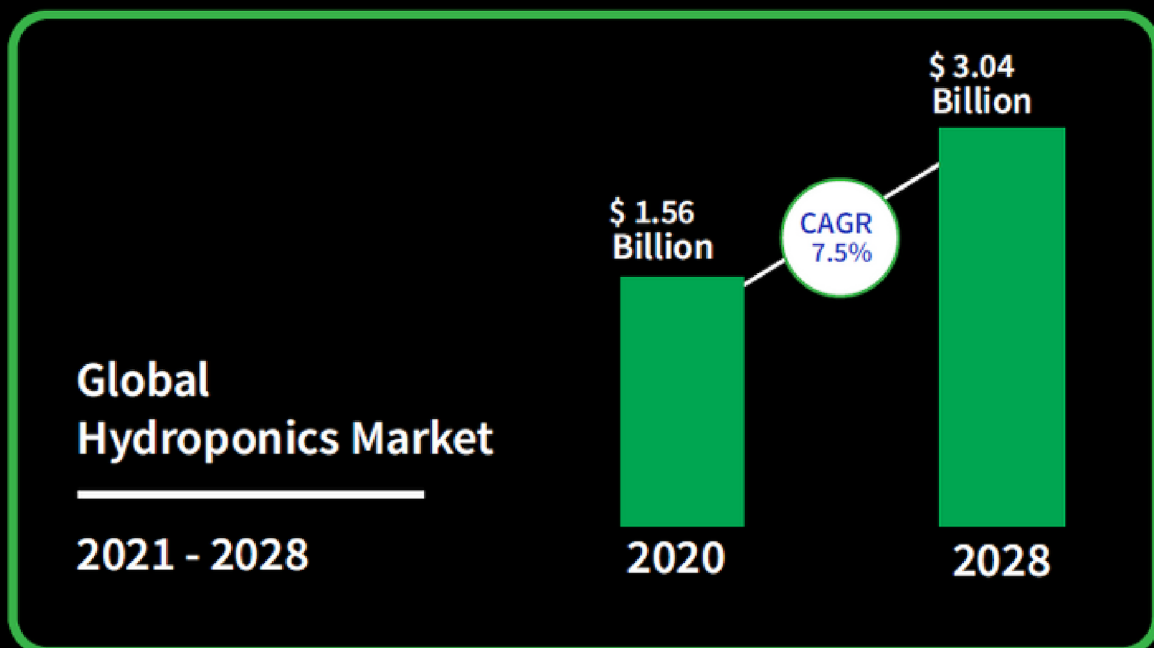

- **Higher productivity** than the traditional farming system, the plant nutrients are effectively used, and there is no wastage.
- The hydroponic system is a **controlled climate system** in which the crops can grow year-round.
- **Water utilization** is 80 to 90 percent lower when compared to the traditional farming method.
- The crops are grown in a closed space, which **eliminates the attack of pests and insects**.

Hydroponics Market Size and Forecast

Hydroponics Market size was valued at USD 1.56 Billion in 2020 and is projected to reach USD 3.04 Billion by 2028, growing at a CAGR of 7.5% from 2021 to 2028.

The growing demand for exotic vegetables such as kale, lettuce, broccoli, and cilantro for use in inter-continental cuisines is a prime factor driving the global Hydroponics Market. This is due to the increasing inclination of consumers towards natural and chemical-free food products. This factor accelerates the growth of the Hydroponics Market worldwide.

The developing regions are centering on building technological advancements to accelerate production to drive the market demand for hydroponic-based products. The Global Hydroponics Market report provides a holistic evaluation of the market. The report offers a comprehensive analysis of key segments, trends, drivers, restraints, competitive landscape, and factors that are playing a substantial role in the market.

Nutrient Film Technique (NFT)

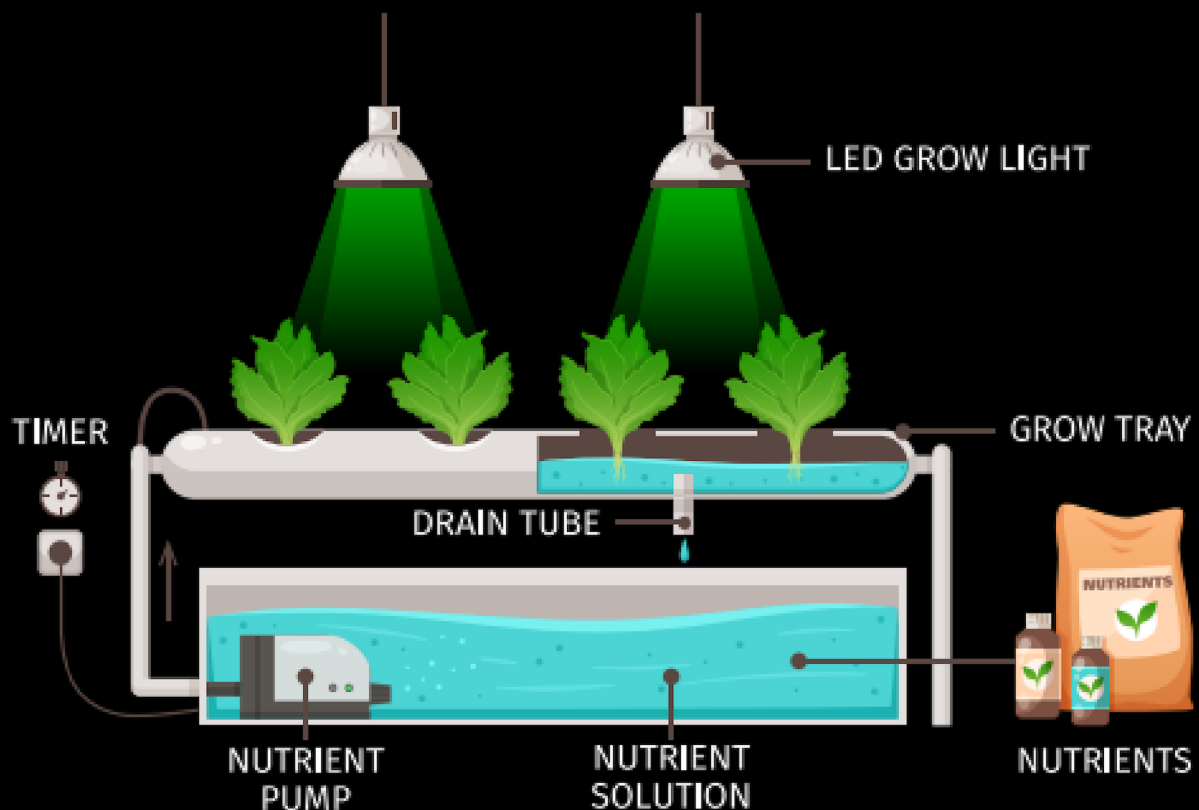

Nutrient Film Technique: Gully channels are used in this system to grow plants, and the nutrient solution keeps flowing in these gully channels. A pump connected to the reservoir pumps the nutrient solution to the NFT channels. One of the advantages of the NFT is the easy installation of the system and the relatively low cost of the materials.

There are two different types of NFT system:

→ Horizontal NFT System

→ Vertical NFT System

UNS Digital Technologies Private Limited focuses on “Vertical NFT System”

Proposed Crops:

Exotic Fruits and Vegetables including:

- Broccoli
- Asparagus
- Arugula
- Red Cabbage
- Spinach
- Lettuce
- Berries
- Celery
- Kale
- Basale
- Rosemary
- Amaranthus
- Thyme
- Basale
- Mustard

and other Exotic Fruits and Vegetables depending on the season and location.

UNS Token Utility in Agriculture

The UNS E-commerce Platform enables direct payments to be made for access to the applications and purchase of the agriculture products through UNS Token. The Payment Gateways support payments in UNS tokens and in fiat currency as well (credit card).

EDUCATION

Education today stands at a crossroads. While core academic knowledge remains essential, there's a growing recognition that a well-rounded education encompasses more. It's about nurturing the mental, social, and physical well-being of learners, equipping them with the tools to navigate an ever-changing world.

The traditional model of education often focused heavily on academic achievement, leaving aspects like mental health and social skills on the periphery. People have warmed up to the idea of education being the key to well-rounded development instead of just a means to acquire degrees and monetary success in life.

Education must facilitate the cultivation of a healthy thought process and groom our cognitive abilities. In the present competitive world, education is a basic necessity for human beings after food, clothes and shelter.

School education must focus on the following aspects, which contribute immensely to the development of the young minds as they step into adulthood:

Mental aspect:

School is the foremost fountain of knowledge children are exposed to. It gives a chance for them to acquire knowledge in various fields of education such as people, literature, history, mathematics, politics, and other numerous subjects. This contributes to the cultivation of the thought process. When one is exposed to the influences coming from various cultural sources, his/her world and existence become vast.

Social aspect:

School is the first avenue of socializing for a child. Until then, parents and immediate family members are the only people the child has human interactions with. And familiarity is a breeding ground of stagnancy. With schools, children are exposed not only to new ideas but also to same-aged compatriots. This instills sociable practices such as empathy, friendship, participation, and assistance which turn out to be important in their adulthood.

Physical aspect:

In school, a child can channel his/her energy into more sociable avenues. Studies have pointed out that while in a familiar environment, the child is equipped to deal with sudden bursts of energy, he/she learns to be at his/her best behavior only when exposed to same-aged individuals. Plus, familiarity leads to taking advantage of situations, while in school, the playing field is leveled. Also, the presence of activities such as sports, and craft help children direct their boundless energy into something productive.

Overall development:

Earlier, schools were considered places to learn events in history chapters, solve tough mathematical problems, or recite poems and sonnets. In the current educational scenario, a child learns to go beyond the traditional way of rote learning. They are taught to develop a mind of their own and through the flexible curriculum, curiosity is promoted. The child is freed from the shackles of mental blocks and lets his/her imagination run its course. Play activities and an encompassing curriculum lead to a well-developed cognitive system.

UNS Education Platform

This platform will act as a guiding hand for students and parents throughout their educational journey. It starts with the very foundation – on how to do parenting, empowering parents to create a nurturing and supportive environment for their children.

Furthermore, it'll provide valuable resources at every stage, from navigating early childhood education to choosing the right vocational path. This encompasses not just academic pursuits but also psychological support and motivational sessions. This ensures students not only acquire knowledge but also develop the emotional intelligence and self-belief necessary to thrive.

The platform will also cater to a broader audience, extending the benefits of lifelong learning to individuals of all ages and backgrounds. Regardless of their geographical location, social status, or economic standing, individuals can access guidance on a vast array of topics. Whether it's seeking spiritual fulfillment or pursuing financial goals, the platform offers a personalized roadmap to navigate life's complexities.

UNS focuses on enhancing the upcoming generation with great potential to grow, learn, and experience. More focus is on enabling every learner to extraordinarily understand the science behind **wealth making** and the curriculum is framed using Professionals with Doctorates in contemporary wealth making discipline in such a way that, the Geological, Biological, Psychological, Sociological and Economic factors that affect people are neutralized and nobody is left without opportunities and avenues to learn, grow and make money as per their wishes.

Through these, UNS Education platform, paints a future where learning is not confined to classrooms and textbooks. It becomes a continuous, adaptable process that empowers individuals to unlock their full potential. By fostering mental well-being, social engagement, and a commitment to personal growth, UNS Education empowers individuals to not just succeed in their careers but also lead fulfilling and meaningful lives. This holistic approach to education is a testament to UNS's commitment to building a brighter future, one learner at a time.

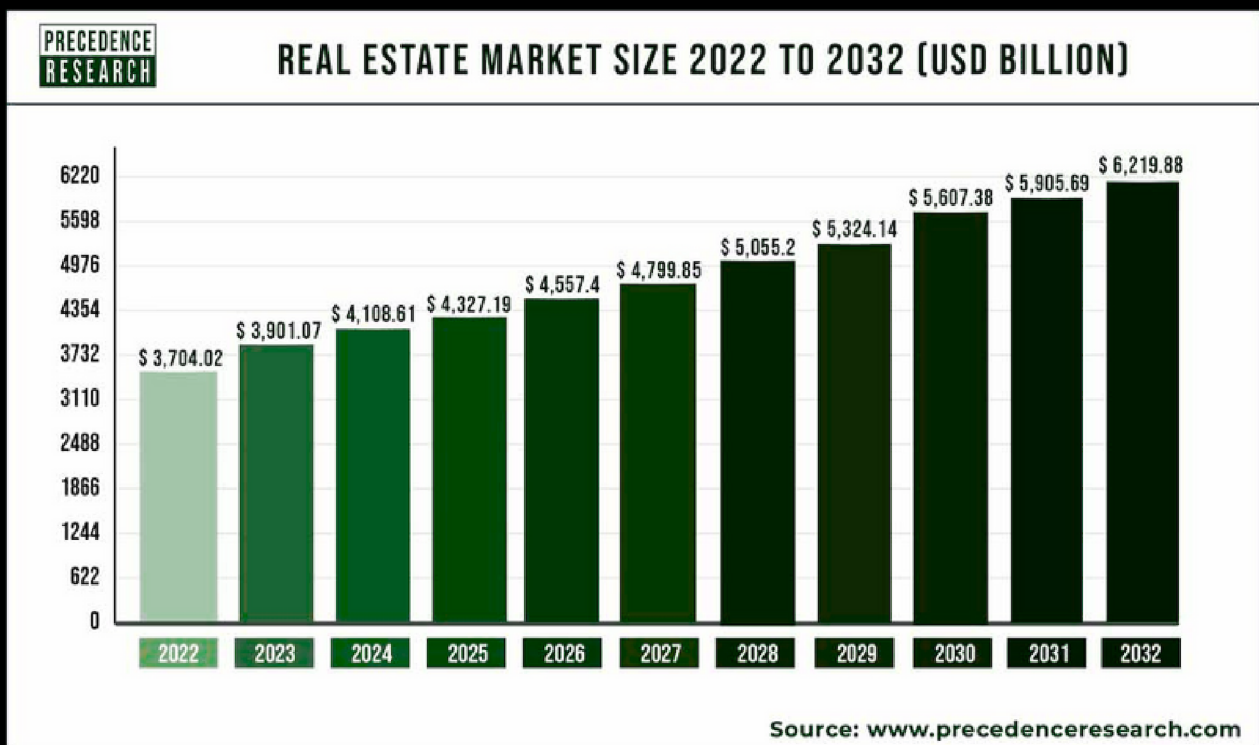

UNS Token Utility in Education

The UNS Payment Platform enables direct payments to be made for access to Education services, discounts, and purchase of any products launched through the UNS Application. The Payment Gateways support payments in UNS tokens as well as fiat currency (credit card).

REAL ESTATE NFT

In the modern world, real estate is a cornerstone of the global economy. From residential properties to commercial buildings and industrial complexes, real estate forms the physical infrastructure that supports businesses and allows communities to thrive. The real estate industry itself is a significant employer, encompassing a wide range of professionals – from architects and engineers to developers, agents, and property managers. From the sprawling estates of the ancient world to the burgeoning cities of today, real estate has shaped the landscape of human civilization.

Real estate is also a powerful investment tool. Property can appreciate over time, offering a hedge against inflation and the potential for significant returns. Rental income from investment properties can generate a steady stream of passive income, contributing to long-term financial security.

Growth expected at a CAGR of 5.32% between 2022 and 2032

Real Estate Tokenization

Real estate tokenization involves transforming physical properties into digital tokens on a blockchain network. This allows for fractional ownership, where a single property can be divided into smaller, more manageable investment units. The creation of NFTs (Non-Fungible Token) for its properties act as a unique digital certificates of ownership, ideal for representing individual rights within a tokenized property. The NFTs are pegged to the property, complete with a digital record of its history and ownership. This not only streamlines investment transactions but also adds a layer of exclusivity and collectability to UNS's offerings.

By embracing tokenization and NFTs, UNS positions itself as a forward-thinking leader in the real estate industry. With this, owning a piece of a luxurious resort or a vibrant co-working space in the travel and business hubs across the world, like Dubai, Singapore, and Thailand, will open doors of investing for a wider range of investors, democratizing access (with DAOs) to real estate investments, previously reserved only for those with significant capital.

UNS Token Utility in Real Estate

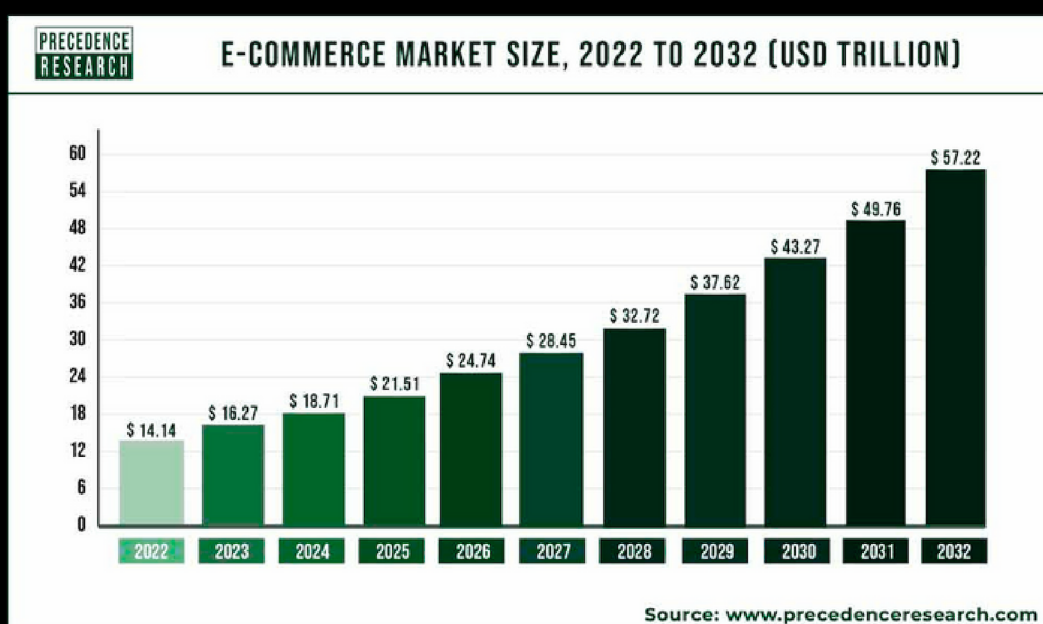

UNS sees real estate not just as an investment, but as a platform to empower businesses, uplift communities, and build a brighter future. UNS NFT Tokens act as investments, that have the power to create a ripple effect, positively impacting the lives of those who reside within its sphere of influence, from supporting businesses and infrastructure development to creating green spaces and fostering a vibrant cultural scene. It's about weaving a tapestry of prosperity that strengthens businesses, communities, and the very fabric of life.

UNS safeguards its believers while guaranteeing the appreciation of its assets. This financial prudence ensures long-term sustainability, a cornerstone for any company aiming to make a lasting impact.

E-COMMERCE

The way we shop is undergoing a seismic shift. E-commerce, the online marketplace where convenience meets vast selection, has become an undeniable force in the retail landscape. Gone are the days of limited choices and geographical constraints. Today, consumers can browse a global marketplace from the comfort of their couch, with purchases delivered directly to their doorstep. UNS recognizes this transformative power of e-commerce and is poised to play a pivotal role in shaping its future.

UNS envisions a future where e-commerce transcends mere transactions. The company recognizes the importance of building a strong online community where customers can connect, share reviews, and engage with the UNS brand. Imagine interactive forums where users discuss product experiences, or live chat features where customers receive personalized support from knowledgeable representatives. This human touch within the digital space fosters trust and loyalty, creating a more engaging and rewarding experience for both purchasers and sellers.

CAGR of 15% during the forecast period 2022 to 2032

This venture goes beyond simply selling products online, its about giving the sellers the ultimate freedom and onboarding experience that they feel valued. Any vendor, irrespective of their resource and size, can onboard and sell it products across geo-locations.

UNS is committed to creating a dynamic and vendor-centric online marketplace that caters to the evolving needs of modern shoppers. This commitment will be evident in several ways. Firstly, UNS will prioritize a user-friendly and intuitive platform, ensuring a seamless online experience for everyone, regardless of technical expertise. Imagine a user in a remote area navigating the UNS platform with ease.

Secondly, UNS will leverage the power of data and analytics to curate campaigns, and personalized recommendations, catering to individual needs and preferences. This ensures that users discover products they genuinely love, while giving a boost to the local micro, small, medium, or even large enterprises, fostering user satisfaction and loyalty.

UNS envisions a world where everyone, regardless of location or background, has equal access to a vast selection of products and a seamless selling experience.

UNS Token Utility in E-commerce

The UNS E-commerce Platform hosts all the real-world utilities of UNS, from agriculture products to education services. The Payment Gateways support payments in UNS tokens as well as fiat currency (credit card).

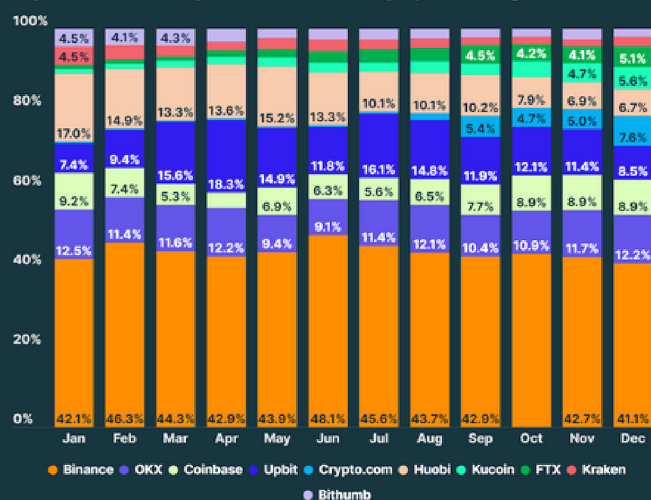

CENTRALIZED EXCHANGE (CEX)

The financial world is on the cusp of a revolution, driven by the emergence of cryptocurrency. The traditional financial systems can be frustratingly slow and opaque. Transactions can take days to settle, fees can be hidden and high, and navigating the system often requires wading through complex paperwork. **Cryptocurrency** offers a breath of fresh air, promising faster transactions, potentially lower fees, and a more transparent system compared to traditional systems.

However, for many, the complex world of cryptocurrency exchanges acts as a formidable barrier to entry. Realizing the need to make the exciting world of cryptocurrency accessible for everyone. **UNS** provides a user-friendly platform that streamlines crypto trading for everyone. With **UNS' CEX** Even a complete novice can navigate the platform with ease, buying and selling cryptocurrencies with just a few clicks.

UNS FOCUSES TO LAUNCH ITS OWN NFT MARKET PLACE AND METaverse SPACE IN PHASE 2

DECENTRALIZED EXCHANGE (DEX)

Decentralized Exchanges (DEXs) offer an alternative approach, empowering users to take control of their own cryptocurrencies. Unlike CEXs, DEXs operate on a peer-to-peer (P2P) basis, meaning there's no central authority involved. Transactions happen directly between users on the blockchain, the distributed ledger technology that underpins cryptocurrencies. This eliminates the need for a trusted intermediary, fostering greater security and control for users.

Decentralized Mechanics:

DEXs leverage smart contracts, self-executing code stored on the blockchain. These contracts define the rules for trading various cryptocurrencies. When you initiate a trade on a DEX, you interact directly with the relevant smart contract, specifying the amount and type of cryptocurrency you wish to buy or sell. The smart contract then automatically matches you with another user on the network who has the opposite trade order. Once a match is found, the smart contract facilitates the exchange of cryptocurrencies directly between the two users, all on the blockchain.

DEX Advantages

- ✓ Firstly, they promote transparency. All transactions are publicly recorded on the blockchain, providing clear visibility into trading activity.
- ✓ Secondly, DEXs prioritize security by eliminating the risk of central authority being compromised. Since users retain custody of their cryptocurrencies in their wallets, they are not reliant on the security measures of a third party.
- ✓ Finally, DEXs are censorship-resistant. No single entity controls a DEX, making it more difficult to restrict access or manipulate trading activity.

UNS' DEX will play a crucial role in enabling peer-to-peer lending, borrowing, and other innovative financial applications. As DEX technology evolves, and user interfaces become more intuitive, it'll invite global players to interact with the platform. With the type of concept and appeal UNS wishes to bring to its Decentralized Exchange Platform, it is certain that it will play an increasingly prominent role in the future of the UNS Ecosystem.

OWN BLOCKCHAIN TECHNOLOGY

While often associated with cryptocurrencies like Bitcoin, blockchain technology has the potential to disrupt and revolutionize far more than just the financial sector. Its core principles of security, transparency, and immutability can be applied to various industries, from supply chain management to voting systems.

At its core, blockchain technology revolves around a distributed ledger system. This record book is comprised of individual blocks, each containing a specific set of data. These blocks are then chained together chronologically, forming a secure and tamper-proof record. Unlike traditional ledgers maintained by a central authority, blockchain operates on a decentralized network. This means there's no single entity controlling the data. Instead, copies of the ledger are distributed across a network of computers, often referred to as nodes. Any changes to the data require consensus from a majority of these nodes, making it incredibly secure and resistant to fraud.

Advantages of Blockchain Technology:

- ✓ **Transparency:** All transactions are publicly recorded on the blockchain, providing complete transparency and auditability.
- ✓ **Efficiency:** By eliminating the need for intermediaries, blockchain can streamline processes and reduce transaction times.
- ✓ **Traceability:** Blockchain allows for accurate tracking of assets and goods throughout a supply chain, enhancing traceability and reducing the risk of counterfeiting.
- ✓ **Trust:** The decentralized nature of blockchain fosters trust by eliminating the need to rely on a single central authority.

Features of UNS Blockchain

UNS Blockchain is built to provide the lowest fees and easiest onboarding experience for developers and users. It is being built to scale, keeping in mind the high throughput, low transaction fees, and rich ecosystem for developers and users. Not only this but the blockchain is optimized with great care to be the best immutable ledger faster than most present today, with remarkable POS Consensus Mechanisms and focused on strongly thrust the Peer-to-Peer Networks. While being fast we also ensure security without any compromise. For us being super fast at the cost of security is not an option! Our Blockchain is secured by several Validator nodes and checkpoints are pushed and verified on the Level 1 network.

The most important feature of our blockchain is incentivized participation, where validators are incentivized to participate in the network and secure the network by staking UNS tokens, which in turn, will take us closer to achieve a truly community-driven network.

UNS blockchain network is scalable, green, and sustainable. It is built on the energy-efficient POS consensus mechanism. It is scalable and can handle thousands of operations per second.

To realize our vision of making blockchain accessible to everyone, we have come up with these products in our blockchain:

1) UNS Faucet: Developers can start developing instantly by requesting Test assets or by visiting the UNS Faucet.

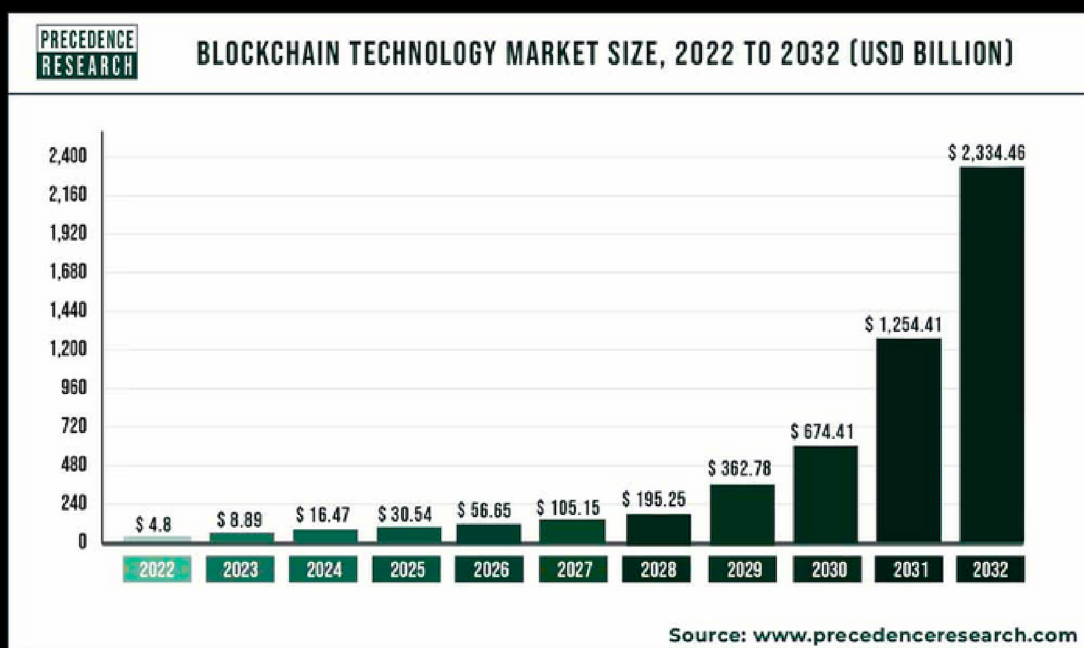

2) UNS Gaze: It is a smart contract deployer to bootstrap your project on UNS Network. Deploy your smart contract in just a few simple clicks.

3) UNS Bridge: UNS multi-network bridge allows asset transfers between the UNS Network and others.

These tools reflect our welcoming approach as we open our arms to new projects, to be built on the UNS Blockchain Network.

The Most important technical characteristic of **UNS Blockchain Network** is the optimized trustless and permissionless one, allowing developers to build decentralized applications that scale to billions of users.

Blockchain technology holds immense promise for the future. As the technology matures and user adoption increases, we can expect to see blockchain revolutionize various industries and reshape the way we interact with data and conduct transactions. By being at the core of the revolution, we can prepare ourselves and all the people directly and indirectly connected with UNS Platforms to navigate and participate in this technological revolution.

CAGR of 85.7% during the forecast period 2023 to 2032

UNS GAMING PLATFORM

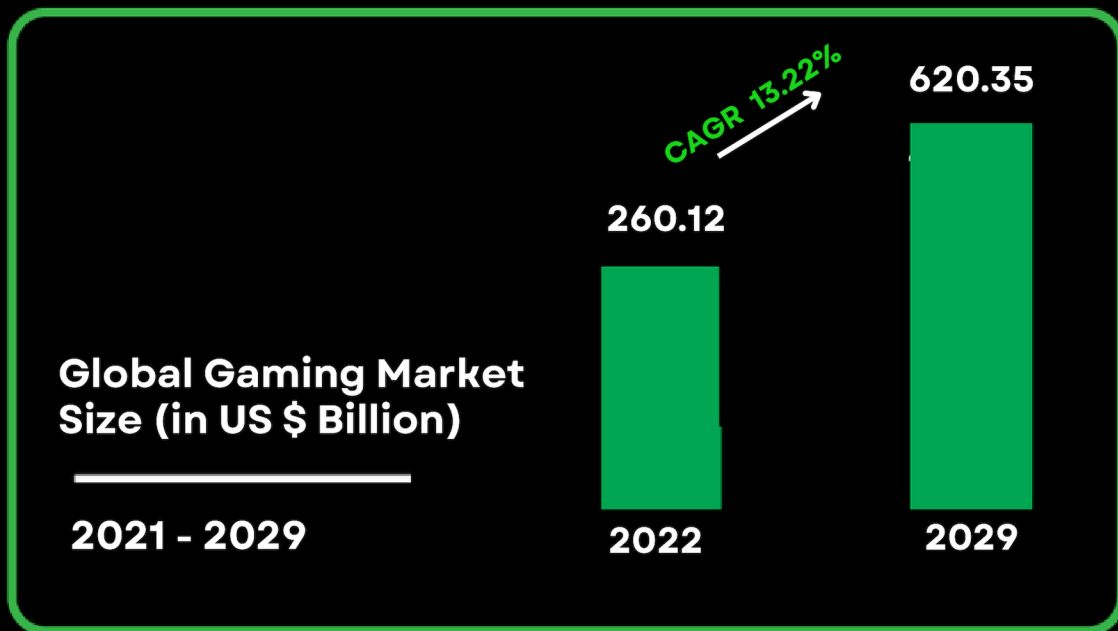

The world of gaming is evolving, there is a need for a groundbreaking gaming platform that breaks away from the norm of destruction and violence and anxious competition and Instead, fosters a constructive environment where players build, learn, and collaborate in a captivating virtual world inspired by the real-life experiences, not just to be entertained but subconsciously learning the right virtues for character development and personal growth.

With UNS get ready to enter a world where gaming and reality collide! A groundbreaking gaming platform that brings the real-life branches of UNS, directly into a captivating virtual world. In the true sense of fostering community and personal growth the platform is accessible to everyone, regardless of location or gaming experience, an effort to transcend the boundaries of traditional gaming.

The platform gamifies education and learning, making it more engaging and interactive. Quests and challenges such designed to teach valuable life skills to the players, which can be implemented in real life, while, networking with other virtual entrepreneurs, forming partnerships, and competing in friendly challenges. UNS provides a platform for building meaningful connections and fostering a spirit of collaboration.

In order to bring a transformative experience, that bridges the gap between the virtual and real world. UNS brings simulations of the Real World UNS-Ecosystem to all its users through this platform. It empowers players to explore the world of UNS and its ecosystem in a fun and interactive way, fostering learning and entrepreneurial spirit.

UNS Token Utility in Gaming

The UNS' Gaming platform utilizes UNS as the in game token, while also incentivising the users by incorporating many constructive play-to-earn games, where participants will be rewarded with real UNS tokens. With this, creating a global gaming community and offering rewards, the platform goes beyond entertainment, creating a valuable and engaging platform for everyone.

HOSPITALITY

The global hospitality industry is projected to reach a staggering \$1.9 trillion by 2023, fueled by a growing middle class, increasing disposable income, and a desire for authentic travel experiences. This boom extends to all sectors of hospitality, from luxury resorts to budget-friendly accommodations. Travelers are no longer content with just a place to stay; they seek personalized experiences, seamless integration of technology, and a focus on sustainability.

Redefining the guest experience

- ✓ Leveraging Technology for Seamless Experiences
- ✓ Prioritizing Sustainability
- ✓ Curating Personalized Experiences
- ✓ Building a Sense of Community

Travel is not just about crossing geographics; it's about connecting with people and places. UNS fosters a sense of community by offering opportunities for guests to interact with each other, participate in cultural activities, and engage with the local community. This creates a more enriching and memorable experience for travelers.

Beyond Accommodation

With the aim of building a comprehensive travel ecosystem that caters to the evolving needs of modern travelers. Special focus on basic staff training, to deliver exceptional service that is warm, personalized, and attentive to guests' needs, not just acting as hosts but acting as their personalized local assistant to every requirement, irrespective of whether it is for business or vacation. This commitment to hospitality ensures that guests feel welcome, valued, and cared for throughout their interaction.

The travel and tourism industry is poised for continued growth, fueled by a desire for exploration and connection. UNS Hospitality, with its focus on seamless technology, sustainable practices, personalized experiences, and a commitment to exceptional service, is well-positioned to thrive in this dynamic environment.

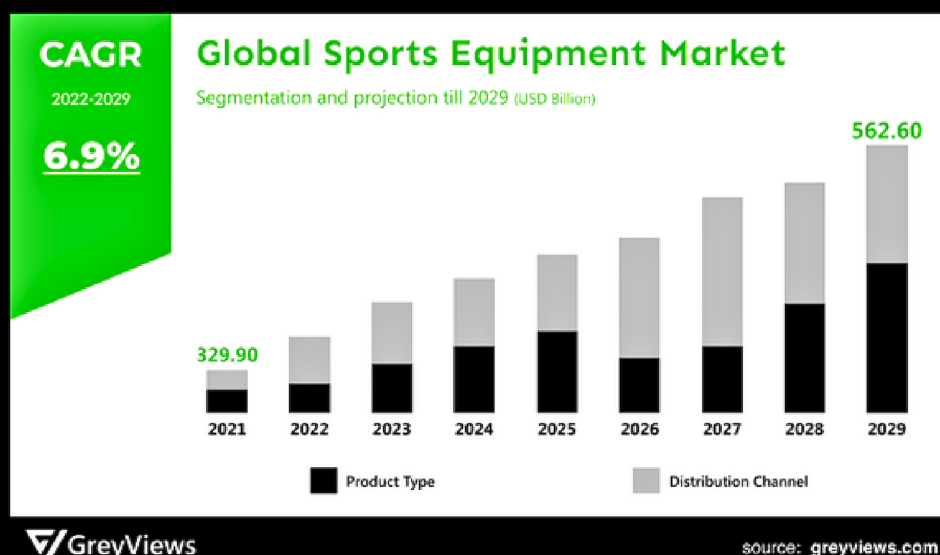

CAGR of 10.24% during the forecast period 2022 to 2029

SPORTS PRODUCTS AND SERVICES

The world of sports is a vibrant ecosystem that transcends mere competition. It fosters physical well-being, ignites passion, and teaches valuable life lessons like discipline, teamwork, and perseverance. Sports transcend cultures and languages, acting as a universal language that unites people through a shared passion for competition, camaraderie, and pushing one's limits. Beyond the thrill of victory, sports offer a multitude of benefits that extend far beyond the playing field.

They are a wellspring of physical well-being, fostering strength, agility, and cardiovascular health. Participation in sports builds resilience, teaches discipline and teamwork, and ignites a sense of accomplishment that spills over into all aspects of life. For youngsters, sports provide a healthy outlet for energy, promote social interaction, and instill valuable life lessons like perseverance and sportsmanship.

Traditional approaches to sports equipment often focused solely on performance, neglecting factors like accessibility and inclusivity. This includes providing high-quality equipment that is adaptable, user-friendly, and caters to a wider range of athletes, from aspiring youngsters to seasoned professionals.

ENERGY

Electricity is one of the cornerstones for a modern society to function. Households, hospitals, air traffic systems, road infrastructures, communication and financial service industries are all dependent on electricity. The renewable energy market is developing fast, due to increasing energy demands and greater awareness of climate changes. This consequently opens new and interesting opportunities.

Research by Bloomberg New Energy Finance (1) shows that by 2040 more than 60% of total investment into the energy sector will go into renewables, which means that the total global investment will be \$11.4 trillion of which \$7.8 trillion will go into renewable energies and only \$3.2 trillion into fossil fuel energy. This is a significant increase of investments into the renewable energy sector, especially into wind and solar power energy; the latter two, according to Bloomberg, amount to more than 65% of total investment into renewables. To contribute to the sector, UNS focuses on generating electricity through Solar Energy.

Solar Energy

Solar energy is defined as the transformation of energy that is present in the sun and is one of the renewable energies. Once the sunlight passes through the earth's atmosphere, most of it is in the form of visible light and infrared radiation. Plants use it to convert into sugar and starches; this conversion process is known as photosynthesis. Solar cell panels are used to convert this energy into electricity.

Solar Energy Advantages

- **Clean:** It is considered to be the cleanest form of energy as there is no carbon dioxide emission like in the case of fossil fuels which is one of the causes of global warming.
- **Renewable:** There is ample energy available on earth as long as the sun exists.
- **Reliable:** The energy can be stored in the batteries, so there is no unreliability.
- **Reduction** in utility costs.
- **Free energy** because it can be trapped easily.

Solar Power Market Share and Forecast

The global solar power market size was valued at US\$ 197.23 billion in 2021 and is expected to hit around US\$ 368.63 billion by 2030, poised to grow at a compound annual growth rate (CAGR) of 7.2% during the forecast period 2021 to 2030.

UNS Utility in Energy

We will start by developing new services which will optimize energy trading.

Firstly, we will establish the **UNS Energy Pool**. The idea is to join together electrical power producers and consumers and enable them to trade electricity through the Pool. After successful registration, everybody can join the Pool. But in order to actually trade electricity one would need to obtain UNS. UNS will be issued at the UNS token sale as a software and energy license to use the Energy Pool.

HEALTHCARE

A vast section of the population are finding it difficult to get much needed day to day use medicines at low price or at affordable price. UNS sees a business opportunity and service to mankind opportunity here and decides to address this difficulty.

Not that people in Pharma Sector are not interested to offer services to mankind in this way.

Actually, it has been the dream of a lot of Experts and Specialists in the Pharma Industry to offer to people the much-needed day to day use medicines for lesser price or at affordable price.

UNS with its extensive network is in the process of finding such Experts and Specialists. Once found, they'd be enabled with required freedom given, with right kind of systems in place, to innovatively manufacture/supply in such a way that the aforesaid medicines are available for the general public at lesser or affordable price.

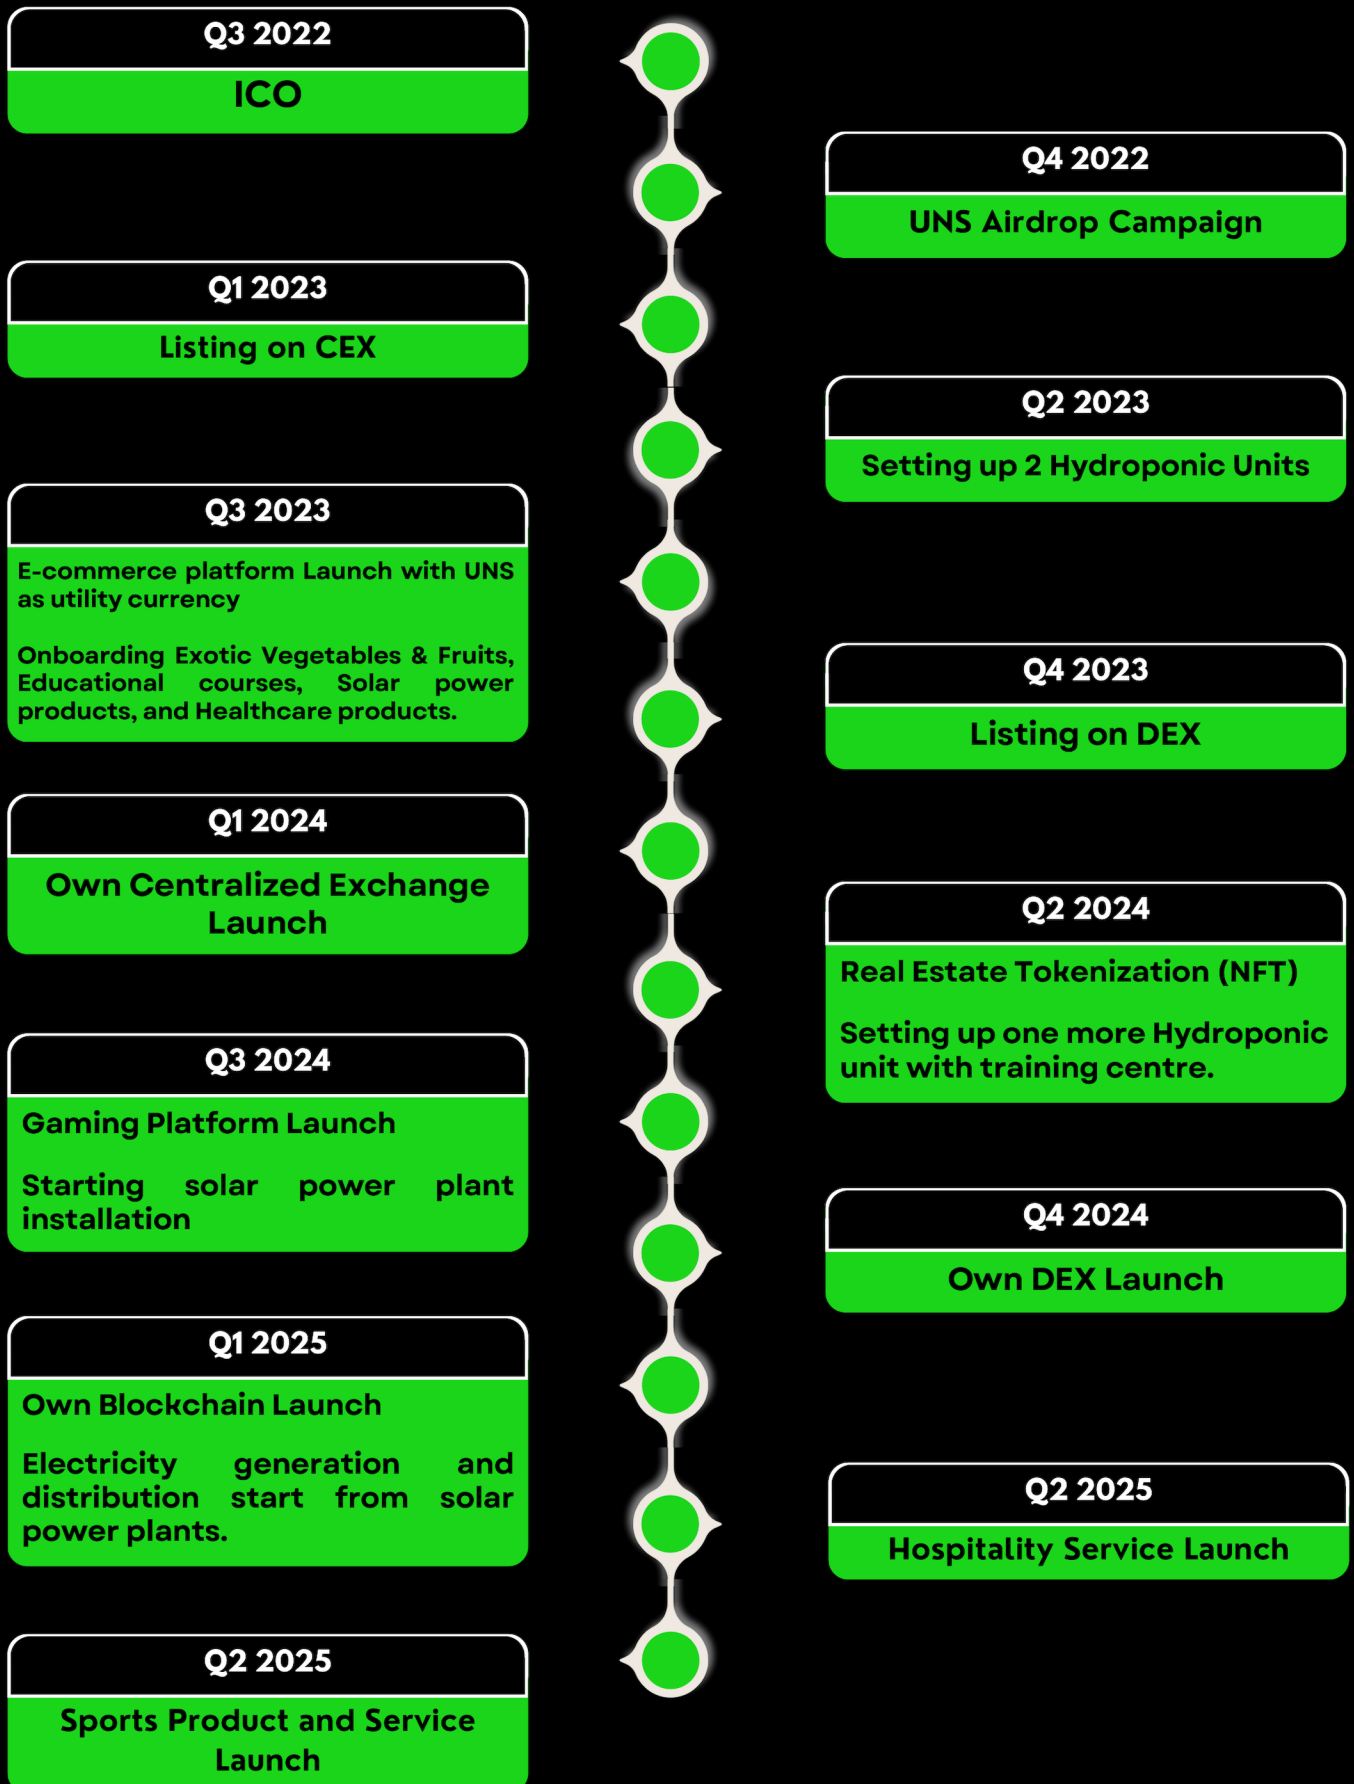

The **UNS Utility in Healthcare** enables direct payments to be made for access to the Applications and purchase of products and services through UNS Application. The Payment Gateways support payments in UNS tokens and in fiat currency as well (credit card).

UNS TOKENOMICS

	ICO PRICE OF THE TOKEN	0.03 USD
	MAXIMUM SUPPLY	10000000000 (1 BILLION)
	TOKEN DISTRIBUTION	%
1	ICO	10%
2	AIRDROP	15%
3	COMMUNITY REWARDS	10%
4	PRODUCT AND MARKETING	20%
5	FOUNDATION	15%
6	PARTNERSHIP AND ECOSYSTEM	30%
	TOTAL	100%

ROADMAP

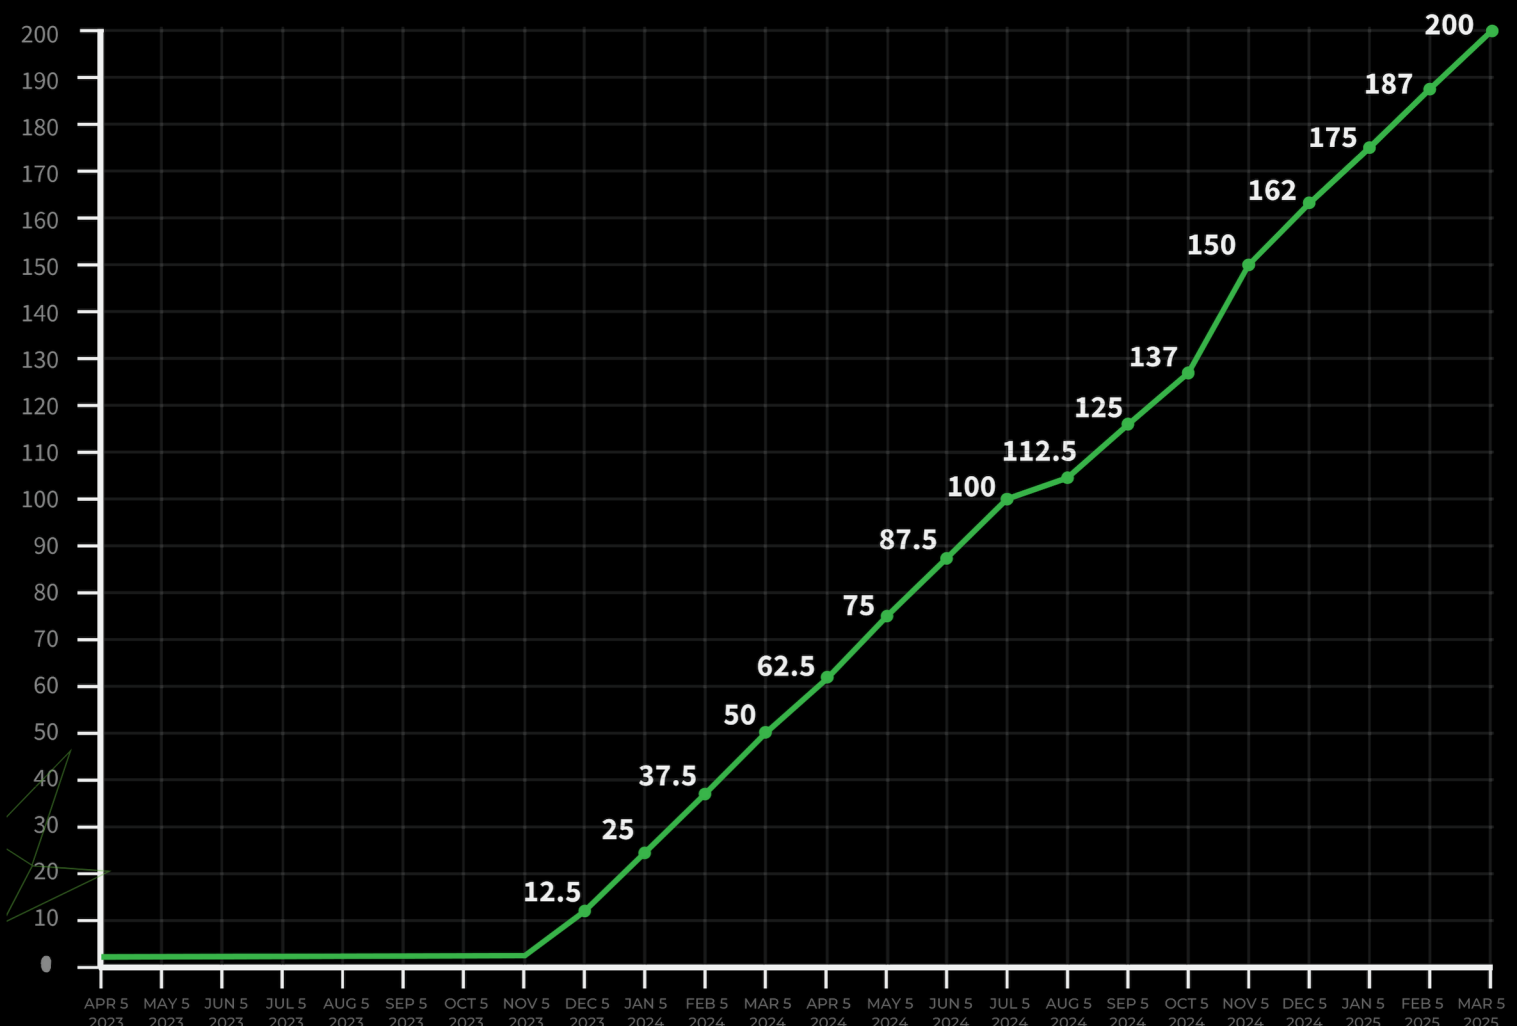

UNS ICO 5th Sep 2022 → 5th Mar 2023

VESTING

UNS team is very well cautious about the interests and fund protection of the stakeholders and specifically, investors and traders should not get affected by tokenomics. So, a deliberate attempt has gone into vesting plans and lock-up periods.

UNS tokens follow a linear vesting pattern where tokens issued during the pre-sale are locked up over a period of 2 years but the initial issue starts from the 9th month. Initial investors also get a 100% token reward as per their initial investment.

So ICO tokens will be released at **12.5% per month** from **6 Dec 2023**.

DISCLAIMER

- This document is a technical whitepaper setting out the current and future developments of the UNS Platform and UNS Ecosystem by UNS Digital Technologies Private Limited.
- Unless expressly specified otherwise, the products and innovations set out in this paper are currently under development and are not currently in deployment.
- UNS makes no warranties or representations as to the successful development or implementation of such technologies and innovations, or achievement of any other activities noted in the paper, and disclaims any warranties implied by law or otherwise, to the extent permitted by law.
- UNS disclaims all liability for any loss or damage of whatsoever kind (whether foreseeable or not) which may arise from any person acting on any information and opinions relating to UNS, the UNS Platform or the UNS Ecosystem contained in this paper or any information which is made available in connection with any further enquiries, notwithstanding any negligence, default or lack of care.
- The information contained in this publication is derived from data obtained from sources believed by UNS to be reliable and is given in good faith, but no warranties or guarantees, representations are made by UNS with regard to the accuracy, completeness or suitability of the information presented. It should not be relied upon, and shall not confer rights or remedies upon, you or any of your employees, creditors, holders of securities or other equity holders or any other person.

- Any opinions expressed reflect the current judgment of the authors of this paper and do not necessarily represent the opinion of UNS. The opinions reflected herein may change without notice and the opinions do not necessarily correspond to the opinions of UNS.
- UNS, its directors, employees, contractors and representatives do not have any responsibility or liability to any person or recipient (whether by reason of negligence, negligent misstatement or otherwise) arising from any statement, opinion or information, expressed or implied, arising out of, contained in or derived from or omission from this paper.
